PRESS RELEASE

GEOTrac releases Version 2.0 Asset Control Center.

Calgary, March 8, 2005: GEOTrac is pleased to announce the release of Version 2.0 for their Asset Control Center (ACC) solution; new version releases will be published and circulated on a bi-monthly basis. GEOTrac's Asset Control Center Solution is a user interface developed to assist users in oil service industry, and transportation. Supporting with the administration of assets, personnel, license/certificate tracking and communication, this solution is a dynamic tool to simplify our client's business processes. Developed with the input from our Industry Advisor Board, some features include;

- **User Administration;** Create/Delete/Edit Users and User Groups, Change/Reset Password.
- **Asset Database;** Create/Delete/Edit Asset and Asset Groups, View Dispatch History per asset.
- **Dispatch;** Dispatch Asset, Create Rig Move Dispatch, View/Edit/Delete (Status, Permits, Items, Assets and Reports) per dispatch, dispatch driver.
- **Driver Management;** Create/View/Edit/Delete Driver info including licenses and certificates, View Driver Logs(with MDT), Expired License and Certificate, (Notification upon login of the Asset Control Center),
- **Messaging** (Two-way text messaging with an MDT only. Message sent by MDT can be viewed by all users who has "Administrator/Power User" privilege) View online/offline vehicles based on current day's activities, Send new message to selected vehicle(s), View all incoming messages from MDT, View/Reply/Delete messages , Auto-refresh vehicle list (10 minute), Auto-refresh message list (5 minute)
- **Point2It**  mapping solution is the visual aid in mapping to view your mobile and stationary assets, location, status, date/time and historical tracking. Some features include; Legal Search,

Zoom options, Mouse Hover Over, Measure Tools, Print, Locate Asset, and Save Map.
Featuring: High Security Login, Integrated Messaging Center, and Online Tech Support.
