About GEOTrac

GEOTrac, headquartered in Calgary with operations in Canada, Mexico and the Middle East develops and markets innovative GPS tools, providing web-based solutions specialized for logistics, asset, fleet and mobile workforce management. GEOTrac's state-of-the-art mapping and wireless technologies assist in providing our clients with the most complete GPS solutions available. Our ability to develop and implement custom applications is further supported by our team of dedicated listeners and developers. GEOTrac's team is customer-driven with the resources, technical expertise and dedication to develop solutions incorporating the latest technologies.

GEOTrac understands that no two companies are alike. That's why we have an open system architecture which allows us or our clients to implement custom features, enabling other competitive advantages. The GEOTrac Team prides themselves in offering a customized solution to best suit your business requirements. For more information on GEOTrac visit www.GEOTracinternational.com
